

## Do you keep a store?

SUMMER people coming for vacation time? Want your share of their good dollars? Want more trade from home people the year round?

Of course! Then read on.

Surely you know Lowney's Chocolates and the good New England Lowney people that make them.

Well—the Lowney people want to sell more chocolates in this town. So all summer long they are going to advertise them right here in your own city.

They will feature the "Prize Chocolates" in the "Medal of Honor" box—Chocolates that won the Medal of Honor for Lowney at the Panama-Pacific Exposition.

Of course you know what that means. Lowney's had to be the finest in quality, taste and appearance of all the Chocolates which competed for this award. Why! 3800 dealers have already declared this is the very best box of candy they have ever sold.

When people see these advertisements signed like this—

# LOWNEY'S CHOCOLATES

65¢ 80¢ \$1.00 a pound

they will know they can get these fine candies right here. In greater variety than ever—more delicious than ever.

And you know this: That when you handle a good candy that people want, like Lowney's, one sale leads to another.

This newspaper advertising is going to be reinforced by the big Lowney magazine advertising. You'll get the help of both.

The Lowney man is on the road. If he doesn't reach you soon, write us for information about the special sales help we are going to give you. Just address—

### BIG GRAIN ELEVATOR IN USE.

That in Montreal Harbor Has Capacity of 4,000,000 Bushels.

Montreal, May 12.—The largest seaport grain elevator in the world now is in operation here, the \$800,000 addition having been completed Tuesday. Lady Borden, wife of Premier Borden, gave the signal which started the machinery for the first time. The addition gives the harbor commissioners No. 1 elevator in the harbor a capacity of 4,000,000 bushels.

The contract for the completion of the addition called for completion on July 15 next, but it has been finished two months ahead of time and at a cost of about 10 per cent under the estimates. Grain from this new elevator can be poured into the hold of any vessel at its own berth in the greater portion of the harbor, and it can unload the largest lake steamer in three and a half hours after its arrival. It is capable of filling the largest ocean-going grain boats in seven hours.

Montreal handled in 1914 more than any other seaport of the North American continent and already this year before navigation opened 5,000,000 bushels were handled, most of it being bagged and shipped by cars to St. John and Halifax. During the winter 41,352 cars were handled from this elevator, which is twice the number ever handled before.

### We Should Worry.

Two married ladies were having a chat, and, as usual, the conversation veered around to the expense of living.

"It's really awful how the rise in prices has affected us!" said one sadly. "Why, do you know that my bills for clothes this year are exactly double what they were last year?"

"Goodness!" gasped the other. "I don't see how your husband can afford it."

"He can't," replied the first, calmly. "But, then, he couldn't afford it last year, so what's the difference?"
